

Alex Collier
Webinar 8
18th March 2016
Host: Jay Pee

Jay Pee: 2016 bring a whole new series of webinars from Andromedan contactee, Alex Collier. Webinar 8, on the 18th of March 2016. Topics covered are Nibiru, black holes, and exciting current events. So sit back, get your cup of tea and enjoy. Here's your host, Jay Pee.

Good afternoon, good morning, good evening, wherever on this beautiful little spinning globe you are. And without very much further ado, perhaps we ought to wait a couple of minutes with a bit of preamble. Alex, so do you wanna tell us about where we're all going and here's your star of the show, Alex Collier.

Alex: [laughs] Hardly, this time. Hi, folks. For all of you that have registered and support the webinars, on behalf of myself, James, and JP, thank you so very, very much. We simply couldn't do it without you, and there would be no need to do it without you. So we are just eternally grateful for your help and your support. This is also a very, very nice way of sharing information without having to do a lot of travel.

As you're aware it's very difficult to maintain a positive field when the news is so dark and so dire, and there's just so much drama. And the whole world is kind of looking like a circus, it really is. Just the things that are going on, decisions being made. So many people just trying to control, manipulate. It's really quite extraordinary, and today there is some significant current stat events. And I know that we talked about there's been...we were supposed to talk about black holes, dimensions, and taking back your reality. I will do my best to cover that, but there are some current stat things that absolutely need to be put out there, and I would like you all to have paper and pen so that you can write some things down so you can do your own research, and I would suggest you do that. So we're gonna cover some things.

After the presentation is over I will be sending some links, YouTube links to James to post so that you can see these things for yourselves what I'm going to be sharing with you. These events are in progress and what I mean by that is that there are many, many moving parts to this, and it's evolving as we speak.

So what we're gonna be talking about here first current stat, it's about Nibiru. Firstly, all the sky-watch cams on the planet are watching this thing. They're seeing it, armature astronomers are seeing it. The news obviously isn't covering it. The governments of the world are not really saying much of anything

with the exception of a few.

On March 15th, a YouTube video was posted by Steve Olson, and this link will be up when we're done. (<https://www.youtube.com/watch?v=XkVSlwe2Emo>) And he has video and photographic evidence of an event that occurred prior to that date, March 15th, of an explosion occurring in front of the Nibiru star and its planetary system that is coming in. They make the presumption that it was an attack. It wasn't an attack. Essentially what it is it's technology that is being used to create a field in front of the star system that stops its trajectory. And basically, what I'm saying is it made it stop dead in its tracks. Now, I don't believe that this was someone else doing it. I believe that the Nibiruans, the Anunnaki did this themselves for the reason that they are having conversations with the benevolence about the planet, what's going on here etc..

So, my point is this, and then we'll get into some other things. The star system, Nibiru the star and it's planets and it's moons have stopped moving. They're sitting just off our horizons. They're not moving. They're stationary at the moment. Now, if they remain there, this would be a really good thing for us because it would allow us the ability to move around the sun to continue our rotation around the sun before it starts moving again, and therefore, we would not have horrific loss of life and the dramatic earth changes. This would be a very good thing if it, in fact, stays stationary and it is stationary, it has been for several days now, and we continue to keep moving, so this is positive. This would put some distance between us and it when it finally starts to move.

Now, I believe that this is a joint...a decision that has been made because they're a warrior class. If they were attacked they would of course respond in kind, and that is simply not the case. So when this event occurred, the powers that be on earth, the Illuminati, the New World Order, they freaked out. They freaked out and they are scrambling. All these underground meetings, many of them are moving into underground facilities. There is all kinds of things going on, a lot of scurrying going on all over the place by the powers that be, because you know, their plan was to try to get rid of two-thirds of the world's population, and because of the benevolent intervention, they were not going to be able to do something completely disastrous. So their plan was, well, when Nibiru come across and creates all these earth changes, then there'll be a dramatic loss of life. Well, clearly that's not happening right now if the statuesque remains. So now they're scrambling because they have no idea what to do next because they're being found out. They're being exposed, and what's going to happen if none of these events happen, all their plans to dominate, to take over, to hurt and harm humanity, to blame us for their crimes, to punish us for the things that they've done to humanity, we're all gonna be looking for them.

So they're scrambling, folks. They have a real problem on their hands and it's just frankly quite awesome. And I'm truly hoping that the statuesque remains, that the Nibiru star and it's system remains stationary for now as we move ourselves out of its way around the sun. If that doesn't happen and they start forward again, I don't know exactly what's going to happen. But even with benevolent assistance, there were going to be some earth changes simply because of the gravitational field of a dark star. It's enormous. Not only that, but it also puts the benevolence in harms way as well, but if Nibiru would stay stationary until we moved around the sun, that's a solution that benefits everybody, it really does. We'll have to see what's going on with that. So we will post that YouTube. (<https://www.youtube.com/watch?v=XkVSlwe2Emo>)

There was also another YouTube post that was on March 13th by Jeff P where it clearly shows an enormous starship cloaking just outside our atmosphere. And that was pretty awesome to watch. The skycam caught it just as it was going invisible, and it's pretty spectacular, and I'm looking forward to you guys seeing that. (<https://www.youtube.com/watch?v=pX2zlQQFtUE>).

Now, as that's going on off world, here on the planet, in Israel, we have prominent rabbis, and I mean prominent rabbis who have been talking not only about Nibiru, but also about the messiah. And the breakingisraelnews.com was the first to break these stories on the internet. There is a January 25th 2016 story, February 24th 2016 story, and a March 10th 2016 story. And according to these rabbis, what they're telling their people, their flock, is that Nibiru is coming and it's bringing the Messiah in its wake. Okay, so let me say that again. Nibiru is coming and it is bringing the Messiah in its wake. As if things weren't strange enough here already. That's pretty significant stuff.

So I want you to research that. It's important that you do because unfortunately we're the last to know what's officially going on here. But what's very important is that we do everything that we can to maintain a positive field, that we stay grounded, that we stay in a position, a spiritual position of love, of guidance. That doesn't mean we give our power away ever to anyone. That is not what I'm saying, but you, as you stay the observer, you have the ability to see how things truly unfold, and to see how people truly react in those circumstances, and it is important that you do that because as you remain the observer your intuition will guide you as to what to do and what not to do. What we don't wanna do is move into any kind of a space of fear, because that's where we kind of nullify our instincts and we don't wanna do that, not with all this stuff going on. We wanna maintain a place of balance, a place of personal power, and knowingness, trusting our own spiritual guidance to know what to do, because as third density truly begins to unravel, and that's the operative word here, unravel, we need to allow ourselves to be guided not only by our power but also by our own soul, our own spirit, because it already knows what's happening. We just have to allow our egos to get out of the way or force our egos out of the way so that we can get that inner guidance. It's imperative that we pay attention to this.

Okay, so that's important. I want you to research these articles regarding the Messiah. I was actually quite surprised that they would be talking about something like this and associating it with extraterrestrials. They're at least being so open about it because you know, clearly we've all been fed a line of bullshit all these hundreds and thousand years by the official Catholicism. And you know, now they're starting to come out, be more open and start talking about these things, and the concern is, and I have said this for years, is that the first group we meet are probably more than likely not going to be friendlies. They're going to pretend to be, and you do not, you do not want to get on a starship with these people, okay. This is our home. If you chose to go, you go of your own free will, however, this is our home, this is our planet, no one can take this from us. You just simply cannot allow that to happen, and the more centered you are in a spiritual space, you'll see all the signs here and your intuition will kick in. It will tell you what's really going on and what not to believe, and to be able to look past the things that they're saying to what they're doing. This is imperative because this is all unfolding. God, this could be some summer, I'm telling you. All these things are unfolding right before us.

Now, again, I wanna share with you, you know, third density is unraveling. And what I mean by that is that we are raising in consciousness to the point where we see it for what it truly is. And once we understand what it is, we understand the lessons that we were here to take care of, and then we can make another choice. We can choose to move to another frequency. I don't know exactly how that all happens, but that is what's supposed to happen, okay. As third density implodes, and I don't know the exact timeline of all that, as it begins to implode, those things that are real, things that are spirit will evolve into another frequency. That's the way of it. That is the way of it. It doesn't happen all the time, so this is a very, very unique experience.

Also, understand that this is all being fueled by not only our rising consciousness, but what's also helping it is the plasma field that we are entering as we are crossing the galactic plane. There are sky

cameras all over the world now taking shots or video of plasma and things going on in our atmosphere. There are some extraordinary events that have been happening in Russia. Ladies and Gentlemen, we are entering the galactic plane which is an enormous plasmic field. This is a form of electricity. This changes things, and it changes things based on intent and spiritual guidance. Please, remember that.

One of your strongest, one of your strongest tools as a soul is your intent. You can intend anything to happen. You just have to intend it, you have to see it, you have to know it, you have to believe it, and you have to assume you've already got it, okay. But it's intent, and the passion and the motion behind the intent that will draw your experience to you. This isn't new. I mean, I know you guys know this. I realize I'm not talking to the first graders here. I know that. I just wanna remind all of you because changes are coming. The changes that are coming are gonna be so out of the box, and most people are gonna be like, "Oh my God. What the hell is that?" And you see, that was actually part of the plan to catch everybody off balance, and to create and make everybody swing into this huge field of fear where they would have control and they could feed off the fear. That was the purpose for setting everybody up for these end times. But that's not exactly how it's going to happen now because there's intervention by the benevolence, and they're not going away.

You know, when will they show themselves? I believe it will be relatively soon, but they're waiting for mankind, for humanity, to reach a specific maturity place, a place of a specific maturity, and I don't know exactly what that looks like. As soon as I find out I of course will let you know because I do wanna know just like everybody else. But these things are happening. There's just simply no denying it and whoever does, wow, you don't want them in your field. You wanna be around people who are aware of what's going on, who can see things that are unfolding. And you know, that doesn't mean you just disassociate yourself, but you bless them, you bless them that they find a clue, they get a clue as to what's really going on here that it is unfolding, it is unfolding.

Now, the interesting piece about the religions, that's very interesting and we've talked about that in the past, about them playing out the second coming. Now, I don't know if Nibiru is really going to be behind that, or if that's just setting the Nibiruans up for that or not, I don't know. It has been assumed that it would be by certain groups that are here on the planet, who are gonna set that up, and stage it as if he were coming down on a spaceship or out of a cloud, and he would physically manifest. And of course, all of that can be done using holographic technology, but again, why would God need a starship? There you go, okay.

So there is just so much going on. Several questions have come recently. I'm still getting to others. There are thousands, I'm sorry. We make reference to sphere beings being here and saying that they're having to postpone things for hundreds of years until mankind reaches a specific level. I just simply don't buy that. I don't buy we have that amount of time, and I don't buy that that intervention is going to occur in that way. Intervention is occurring to bring us up to speed as quickly as possible. They are not going to leave things here at a hundred years as the statuesque is. That simply isn't going to happen. That simply isn't going to be allowed in any way, shape or form, okay. Humanity can get things pretty quickly. Yes, they'll freak out. Yes, there'll be a period of great anguish, of sorrow, and then of anger, as they find out that most of what they've been taught by the Catholicisms has been a lie. Who wouldn't be pissed off about that? You know, they're gonna be upset, they really are. However, if you can empower people with the truth, with tools to spiritually empower themselves and feel fantastic about themselves, and know that they're not powerless, that they have the ability to change their lives by intending, by knowing what it is they really want, people can move through that stuff really quickly, they really can and I think they want to.

You know, I think bottom line, everybody wants to be happy, everybody wants to feel safe, everybody wants to grow. They want to empower themselves. They want love in their life. They want their children to be safe. They want a safe environment to raise their children to life. You know, there are extraterrestrial races who want exactly the same thing, these very same things. So we are not all that different. It's just peeling off the crust of crap that we have been feed for so long. And with these events that are happening as we speak, it looks like things are in gear.

Things are moving along, they're picking up. You also know that there's a signal coming from space, a repeated signal now that's coming from space that many scientists are taking very, very seriously as a signal from ET, okay. I am waiting for an answer as to whether or not this is really coming from deep space, or if it's coming from a starship that's outside trying to pretend that it is from deep space and it's from a different race that isn't here, okay. When I find that answer we will post it.

You also know that the European Union has sent a spaceship to Mars to find if there's proof of life on Mars. I also find that very interesting, the timing, especially since we have so many rovers all over the place, and satellites that are still there that we know nothing about, and of course the bases that are there etc.. So I think what's happening is that the plan that the powers that be had to keep us completely in the dark until this event occurred, this geological event with the passing of Nibiru, I think all bets are off the table now because their plan isn't simply going to unfold that way, which is a good things, which is a good thing. It was absolutely diabolical anyway to put humanity in harm's way that way just so that they could maintain control and prove, and come out at the end of all that catastrophe with a much smaller population. Then they could come out with all the ET technology that they've reverse engineered, and everything else, and look like heroes. For what they have done to humanity for all these years they absolutely do not deserve to be hero's, and they never ever, ever should be treated as such. Because this could have been done hundreds of years ago if they really wanted to, okay, but they didn't. Instead, they chose to create wars, they chose to create religions. They chose to create hatred, poverty, starvation etc. etc. etc. Okay, so I'm off my soapbox in that.

So that's what I have for current stat. Black holes. There is an astonishing amount of new information coming out of our black holes. I want you to understand that each dimension...and I will use third density as the best example that I can give you, and then I will give you my own personal experiences with fifth density. I do not have a lot of fourth so I can only share what I know about that. I know that there are other people who have experienced fourth density, whether they are using their dreaming bodies, they practice the Toltec techniques to travel, and other people who use other types of techniques to travel. It's time for them to step forward in a way that they feel safe, and share their experiences of what they know is going on.

Each dimension has an ecosystem. Each dimension is in fact, an ecosystem. It has an environment, it registers itself. It understands positive field and negative field, that is once you get beyond fifth density into sixth there is no negative field from what I've been told. But for our purposes, there is a negative field that we still experience here in third density. I know for a fact fourth density also has a positive and a very large negative field which is definitely pretty negative. And then there's fifth density where they have more positive and a very small negative field.

Each one is an ecosystem. A black hole, the black holes were put in place so that when a particular field, whether it be physical or not goes completely negative, or has lost its intent and has fallen into negative field, negative energy, negative discharge, it will be drawn to a black hole, whether it's a star or not, and it will be devoured. The purpose for that is to remove it because it's negative. If it's creating more negativity, the ecosystem will correct itself and it will be drawn to a black hole, and it will go into

a black hole. Now, what happens is, the actual physicality of it is completely obliterated, it's gone. What survives is the positive spiritual energy that came from the experience. That is what we see returning and it looks like different things. It could look like out-gassing, but essentially what it is is atoms and electrons that have been charged with positive thought. That's what comes out of black holes. The physicality of such is pulverized. It's gone forever and other things will be drawn to those black holes.

Now, what's interesting is that many galaxies have black holes underneath them, and they currently sort of hold them in place so that these galaxies don't wander. Some galaxies don't have a black hole and they wander. That is clearly by design because this is an ecosystem. Each dimension is an ecosystem. It is just not this big random field where just random shit happens all the time. There is a methodology to it, and I'm simply not smart enough to get all those pieces to fully understand how that works. But I am giving you the pieces that I do know about that have been shared with me and it is no different on the other dimensions.

Now, obviously, the galaxies that have black holes under them, whatever the original intent was in creating the galaxy, there must have been a point where the creator knew or knows that it's going to go negative field, which is why there's a black hole. So the ecosystem is there. It's already in place that should it go negative field that it will begin to descend into the black hole. And I find that interesting. I wonder what kind of beings are actually inhabiting galaxies where there is no black hole and those galaxies are wondering. They're moving throughout what we see as third density universe. I would like to know that because maybe there's something there we need to look at, or know about a knowledge or a wisdom that they have that we could use.

I have also been told that there have been times in the past, not only on third, fourth, and fifth, where black holes based on the spiritual evolution of that particular galaxy where the black hole closed. It actually closed and went away. Is that what's gonna happen with us? I don't know. Is that what's gonna happen with other star systems or other galaxies? I don't know. But I've been told that that's occurred in the past.

So what that tell us is that clearly it's in our hands as conscious beings. To me, the logical breakdown of such an event like that occurring where a black hole closes is that the inhabitants of that galaxy were all on the same page. They weren't at war with each other, they understood each other, they had mutual respect for each other, and they came into a place of unity where they vibrated within the same range of love, respect, and honor, which created such a positive field that the black hole was closed. That's how I see it.

So on fourth density, the fourth density sky is not the same that we see. The star constellations that are in the fourth density band or realm, or sound, color, light, and sound, which is more expansive than ours, it's not the same sky. So everything would look different. You would feel lighter. Things, events, happen quicker. Your ability to manifest physicality is a little bit quicker than it is here. When you get to fifth density it's the same thing. The sky doesn't look anything like our sky here. And what's interesting is that what we call the universe with all of its dimensions is a huge circle, and contained within that circle are not only all the different dimensions, but all the life and spiritual knowledge and wisdom and events, and timelessness that goes along with it. What's amazing is that we all share the same space. It is just one band on top of the other as we evolve. You pass through one into another as you spiritually evolve. And it's absolutely extraordinary when you stop to think about it and each dimension is its own ecosystem. It has a knowledge, a natural knowledge on what is positive and what's negative field, what's healthy and what's not, and it reacts based on those energies, and it maintains or

does what it's supposed to do to maintain a balance, a healthy balance. For example, when a star goes nova here, there's a reason it went nova. It was supposed to go nova because it reached a point where it was not creating or part of a healthy ecosystem so it was meant to go.

You know, creator is far more smarter than we can imagine I think. So dimensions. I wanna talk about dimensions, and then I want to get to some questions because I know there's a lot of them. I'm watching them scroll here, it's pretty wild.

If you were standing on the beach and you look out over the ocean, you know that there's things going on under the water, but you can't see what's actually going on under the water unless you wear a special apparatus and you'll actually go down. You dive into the water and you're there for a considerable amount of time. And it is essentially a different world than that on the surface. Well, fourth density is very much the same thing. You can stand on the beach on fourth density and you can dip down if you're in a star-ship or special apparatus, and you can dip down into third density and you can see what's going on here. But it is in fact, a different world, and you need pretty much a different type of apparatus or technology so that you can stabilize your field in that lower frequency.

So that's the best analogy I can give you, and then on fifth density, it's the same thing. You can dip down into fourth. You can clearly see what's going on using special technology that balances and stabilizes your field because you vibrate at a higher frequency. As you dip down, and then you go through fourth into third density, it's exactly the same thing. You have to adjust your technology to stabilize your field, because literally what you're doing is, here's third, here's fifth, you are connecting. You are creating a link, a vibrational link from third to fifth density. Even though you are from fifth you are in third, that linkage remains the same, you see, because they're connected to fifth. Literally, what they do is they pull the frequency of fifth density down into third. So when this occurs we are getting fifth density frequency, we are getting fifth density harmonics which is helping to change things. This also happens when you're in fourth density, and a positive field comes down and affects, and sits for any length of time in third density. You are creating that field, that linkage, so you're getting positive fourth density field.

Unfortunately, the rule still applies when you're dealing with negative fourth density field who come into the third, and adjust their technology, and they're here for a while, they're also pulling in fourth density negative field. And it's energy, it's all energy and it's important that you truly understand what that means. The energy that you put into creating a project for work, or a school project, a bulletin board, to making a video, the energy, the focus that you put into it, it is no different than when those fifth density beings come down into third, the focus and energy that they put into a project, whether it's to remove the Orion group, to get rid of the grays, to contact people. If any one of you, myself included, you know, the energy that's brought in, it stays with you, it changes you, and what happens is once that happens you ground that energy to the third density. You become a lightning rod. You hold that frequency here both positive and negative.

Now, if you don't want to hold negative energy then just shake it off and choose to hold positive energy. You can do that. You can easily attract if you've been exposed to dark fourth-density energy, you can easily attract positive fourth-density energy because you're connected to that sphere, you are connected to that realm, that band of energy. You are, you can do this. You just have to consciously know and be willing to do it. It's all about intention folks, okay. It's all about intention. And that is the operative word here with everything that you do, know what your intention is and to do it. Oh my God, it is so powerful. I simply can't explain it any better than that, it's just so powerful to be consciously aware of what your intention is in doing something, the things that you do every day. When you go robotic with

the things that you do in your life every single day, whether it's to do the laundry at the same time every day, or watch your television programs, or soap operas at the same time every day, to turning on a radio program every day, are you consciously aware of your intention why you're doing it, or is it just something that's become a habit. What you don't want to do is to allow your subconscious to make a habit of your mind, of your thinking. You don't every want to do that. It's imperative that you consciously be aware of your intention of what you're thinking and why you're thinking, and why you're doing things. What it is, it's a reality check. You don't want your subconscious to run amok by assuming that it can think for you in the form of habits. You just don't want to do that.

Jay Pee, can we do some questions now? Would that be all right? I'd be very comfortable doing questions now if everybody is okay with that. There you are.

Jay Pee: Here I am coming back.

Alex: So are we good with that to do some questions?

Jay Pee: There you go, you can see me. Yeah, there we go. Hi, everybody. Great, so let me just...there we go. So let's start with some of these questions. One of the things I wanted to say here, Alex, is that there are a few questions here that are...they're about people, other people. So I'm going to just filter out those because they're saying, "What do you think of so and so, what do you think of..."

Alex: Listen, I'm not going to criticize other peoples journey, their experience, because I know that they'll have an opinion on mine. But I'm just not interested in playing that game. I mean, ultimately you're the ones who have to decide, you have to make the choices. You have to figure out what it is that you want to know and how you want to know it, and what it is you want to experience based on what your intention is for being here. And if you can't figure that out, just make up an intention of why you think you want to be here and just go from there. But the point is, empower yourselves. Just come up with your own ideas of why you think and what you think is happening. If you put it out there, if you put the intention out there that I want to know about this, believe me, the universe is going to respond. Fifth density is going to respond, fourth density is going to respond and they're going to bring the answers to you. It will absolutely happen, okay. Just be patient, allow the universe to do its job. It will happen. We're getting so much help, it is stunning, but I'm not going to criticize anybody. Shit, I got other things to do. Okay, Jay Pee.

Jay Pee: Absolutely, absolutely. So the first question from simply the letter L, "Is disclosure going to happen soon?" Happen soon? [laughs] I'd say, well, I mean, on you go Alex.

Alex: It's happening. What is it you expect, a news conference. I don't see that happening.

Jay Pee: I think she's expecting Obama to say, "Fellow Americans, I got something to tell you..." [laughs]

Alex: No, I don't believe that's how it's going to happen at all. It's happening, if you're paying attention it's already happening and you can see it. There is so much going on that why would you believe Obama, I mean, really. They have been in league with the grays, the Orion group, the Reptilians for years and years and years, subverting the constitutions, subverting individual liberties, subverting freedom all over the planet. Why would you believe them? I mean, really. Okay.

Jay Pee: Okay, so first interesting question from your namesake, Alexander. He's a good attendee. He's

been on a few. Bosnian pyramids, can you speak to the benefits that pyramids play upon the surface of planetary bodies, very good question, as well as any information you have about the origins of the Bosnian pyramid complex.

Alex: I don't have any information other than what's been written about. I have not had an opportunity to even have those conversations with **Morne**. So I don't know. I do know, I will say this, though, there is no accident for its placement. Now, obviously, the earth was in a different...the north and south pole were different when that pyramid was created. Now, it could be that when it was built, it was built for a very specific purpose to pump energy into the atmosphere, or to help stabilize the rotation of the planet. Because if you were to take the pyramids off the surface of the earth, and if their position is underneath the ocean, the earth would have a horrible wobble because of the scar that we know as the Pacific ocean. Okay, it's a huge scar, and it causes the planet to wobble terribly. The pyramids were put in those specific places to help balance, like a tire, to help balance the rotation of the planet. As far as the Bosnian pyramid, my guess is that the earth was in a different rotation, north and south longitude. It was on a different rotation, but that's the only piece I have for you. No, I don't have anything else other than that.

Jay Pee: I think the word you were looking for is orientation, is that right?

Alex: Yes.

Jay Pee: Pointing in a different direction. Question from Denis, can our soul reincarnate to other species on earth, and how do we choose into which body we would go?

Alex: I don't believe you can go back. You can't go from human to horse, human to turtle, okay. You can't become a Ninja Turtle. That's just not gonna happen. But you can change sex and you can evolve into a higher level of human being. So if that's your question, that's...

Jay Pee: Thank you. From Penny, back on the second or third webinar, I asked about what's a typical day in the life of the As, and Alex said he would have to think about that and would address it later. Now, you did cover it a few weeks ago, but...she continues, I am still waiting for a picture of how a civilization can work without money, and I think that's really the you know, you spoke about the other parts of it, but how do they...okay, so you know, we're paying rent on a planet we were born on. How does it work for everybody else?

Alex: Well, if you begin with a civilization that has the premise, that begins with the premise that all life has value, and that all life has a responsibility and a right to exist to evolve and explore itself within a community, a spiritual community, then you wouldn't need money. One of the hurdles that we have to deal with during the mentorship is just that concept about how to remove ourselves from a monetary system, and to see how every action we take has value by itself. Now there are people who are going to incarnate who would want to experience growing, harvesting, farming, horticulture. They're going to want to experience that because it's part of their evolutionary path.

Now, the As, they have people who work in their orchards, and this is what they do. I mean, their students, their children go to school for the equivalent here on earth of 150 years. They learn all the sciences, and as they grow each one of those sciences they dedicate so many years to learning what that science is. And because they continue to grow they have what is called the law of consistency where everybody works towards a common goal. This isn't communism now, everybody works towards a common goal where the youngest are taught by the oldest everything they know, so that as the youngest

are coming up to speed there is absolutely no loss of logic, no loss of knowledge. The younger generations are as smart if not smarter than the older generations, and as the older generations fade away, the younger generations immediately take their place, and they move on and they carry the civilization, their particular race into the next higher levels of evolution, and it's called the law of consistency. They teach everyone the same, so everyone moves with the same intent of evolving their race.

They don't see themselves as blacks, or whites, or Chinese, or Japanese, or North Koreans, or South Koreans. That shit doesn't exist because it only creates rift. It only creates disharmony and it only creates negative field. And that's what's happened here and that is why these alien groups that have been here, the regressives have had such control over us because they've been able to sell us on that shit. And once they get us to believe it, it becomes a reality. Once we believe it, it locks itself into place and it becomes reality. And in order to prove ourselves right, we will hold onto that reality. Then you know, because we think this is the way it has to be. It is only now that everybody is starting to kind of wake up saying, you know, this just doesn't work. Because we in no shape or form practice the law of consistency here. It's a miracle we have made it this far with all the anger, hate, and war, and weaponry that's been created on this planet. It truly is, it's been a miracle.

When the mentoring begins, whenever that is, that's one of the first things they're going to do is they're going to have to change our thinking into your actions aren't about paper with pictures on it. It's about contributing to the whole. That's the first thing, it's contributing to society as whole. You don't need money to survive. The fact that you're here on your planet gives you the right to be able to survive. We don't have that logic now. We don't have it at all. We think we have to do it for money, and who prints the money? Where does all that wealth come from? The powers that be. The Nephilim. Here you go. It's really quite simple once you break it down.

Jay Pee: Thank you.

Alex: Okay.

Jay Pee: The next question from Annabelle Bella, are you familiar with the **Yahweh** tapes, and are some you know, the first one I don't know, but are some Anunnaki good? That's a good question.

Alex: Okay, I'm not familiar with the Yahweh tapes. I don't know anything about that. And obviously, some of the Anunnaki were good. You know, the fact that, and I was having this conversation yesterday, the fact that the star system has stopped and is possibly waiting for us to move around to the other side of the sun tells me that Enlil, a.k.a. Father of Jehovah is not in charge because that's a very benevolent act to wait to allow us to get out of the way. That's a benevolent act. You know, the Enlil side of the family has not been known for its benevolent acts especially towards humans here on earth. So it would suggest that a more benevolent prince is now raining the Anunnaki tribe, which should be a really, really good thing because they would be a wonderful ally to have, because they could teach us so much about ourselves having been the last real race that was here. They could teach us a lot about our history, and I would want that to be taught in a very benevolent way.

Jay Pee: Wow, that's good news. From Grace, several months ago you spoke about a veil, grid, or net going down. Can you speak more about this grid's purpose, and the results to dropping this net and how was it put into place?

Alex: God, I thought we already covered that, but I'll cover it again.

Jay Pee: It's of a bit more detail, you know. Who put it there, and what it was put there for and things?

Alex: The regressive put it there. It was put up there by the Orion group specifically, and basically, what it did was it stopped, it created a field of energy of a radio wave for a lack of a better word, where cosmic energy, cosmic knowledge would not penetrate our planet. We could send information out, garbage out, but nothing would come back in. That's what its purpose was.

And, you know, understand stars, stars when ET races communicate with each other across the universe or a galaxy, that information is sent using stars. Stars transmit an enormous amount of information, knowledge, and frequency. I mean, there is some wisdom to sun worshipers, there really is. We make fun of them, but there was some knowledge to it, and if you go back to the ancient civilization that held a pretty high level of consciousness, they were all star worshipers. A lot of data and information comes from stars. None of that was actually reaching us except for radiation. And you know, they're a very sophisticated race, they knew exactly how to filter the knowledge but allow all the other stuff to come in that would not benefit us.

So the benevolence, what is happening or what was happening I should say is that they would come in with their ships, whether it be mother ships or not knowing that they would not be attacked, what they would do is they would park them just inside the net, the field, and they would burn holes in it. And they would know that as soon as that hole was built, it would take so many weeks for that net to refill, and what they did was they just burned it out. They burned that field out by putting ships inside of it and burning all these holes, and there was no way that it could eventually replenish itself. And then what they did was the satellites that were creating this field were just taken out, literally just pulled out of the atmosphere so they no longer exist. They're just not up there. There's no more hardware up there to even work. They just took it all out, and now what you're seeing is this flood of information, of knowledge, of spiritual essence hitting the planet, and everybody is getting it whether they're bricks or not. They're all getting this frequency and people are starting to react to it. They're starting to absorb it, to ask questions that they wouldn't ask 10 years ago to rethink the way that they see things now, but that was impossible 10 years ago. We all know people like that. Well, this is this frequency and we are also getting bombarded with knowledge, spiritual knowledge that is very subtle, but that we are all getting on a soul level and energetic level. It's an amazing time and it's all positive. We just have to get rid of some pockets of no-gooders that are still here, and that's happening. But you know, it has to happen in such a way that they see...

When you have regressive groups that are very, very negative, that are just empowered by negative field, the first thing they do is they put innocence between them and the light. It's the very first thing they do. And then what they do is they threaten the light with harming the innocence so that if anything happens it's on the head of the innocence. This is how they work it by the innocent ones which would be most of humanity.

And I've said this many, many years ago that you know, we're being held hostage on our own planet and no one has a clue. Well, that's pretty much what's happening, but when humanity is evolving and changing its own field from negative to positive, which is what was happening, their grip on humanity is lessening and lessening to the point where they are now beginning to separate from humanity. Their field is causing them to separate away from humanity, and when it gets to a specific place, okay, they will not be able to touch us because our field will be so positive, and that's when the benevolence are gonna come in just bam, you're done. That's how it has to happen and it's taking a while. But when humanity reaches a certain point of frequency and the regressives no longer have any ability to harm

us, they're going to come in and take it. They're going to take it and wack them. That's how this is gonna work. This is how it's always worked.

Jay Pee: So it's a bit like one of those old-fashioned flash guns that you hear this SSSSSS, and it builds up and then there comes a point when you can take the photo. So when the earth peopl's energies is high enough, they're not going to be supporting the regressives.

Alex: The negative field we talked about, it can't exist here.

Jay Pee: So one last connection with this is are these satellites the black night satellites?

Alex: No.

Jay Pee: No, that's something different. All right, so a question from Richard. Alex, how many times do you have contact with the As today? Is it the same as 10 years ago or has it changes?

Alex: There's never been a schedule. There's never been a pattern to it. It just doesn't exist and they do that for a lot of reasons, not only for me but also for them.

Jay Pee: So that they don't get shot down.

Alex: There is no watch. There is no calendar, you know. Here's my Amazon calendar, be here, be here, be here, be here, on these days. No! No, that's not how it happens, plus we're dealing with [another dimension? 01:01:11]...

Jay Pee: Actually, there was a question about that, Alex.

Alex: ...[? 01:01:29] between the lines. It's quite complicated actually when you break it down. So there is no schedule, there never has been, and I'm on the record of having said that 20 some odd years ago as well.

Jay Pee: Yeah, you can figure it out, but they wouldn't do anything. But here's a question from Denis. How do the As deal with time, for example, not to be late on meetings, gatherings, or school lessons? Do they use some kind of clock?

Alex: No, not to my knowledge at all. I speculate here but for the short time that I was in fifth density with them it would appear that they would...their motivation was never time but events. They always knew ahead of time of events, and they were always positioning themselves to be in the right place for an event. There were no times or calendars because events are not dictated by time, not like we have here on sports or football game. In space, it's completely different. We are talking about a completely different environment and what we have on earth is so structured as to almost be a prison. And there's no way for me to even express this to you unless you yourselves have an experience with a group in fourth or fifth density. Then you will just understand how completely different it is. It is such a completely different reality that there's no way to actually compare it to what it is we experience here, the solidity that we have created physically around our reality. When you move up into forth, or you go into fifth density space and you spend any amount of time there, when you came back down you're like, "Oh, my God." That's the only way you'll ever see it. The structure, the solidity of it. How firm it is. It's like being in a prison. It's like being in jail, it really is. That's my perspective. That's my perspective.

Jay Pee: Thank you. So where are we? Oh, there's a good one. Is there the same number of souls in our universe or can a new soul be created, brought into our universe or be destroyed?

Alex: My knowledge is, souls cannot be destroyed and I do not know the number, and I don't know if any new souls are coming in. Again, as I explained to you, the universe with all of its dimension is a sphere. It may be that...this is pure supposition on my part, it could be that there are a number of souls in that universe who have to experience all the dimensions and the evolution, because it's a closed ecosystem with all the dimensions. That's my understanding, or at least that's what the As are being taught is that it's a closed ecosphere. And a new dimension was in fact created, okay, a twelfth, and new souls, beings did appear within that twelfth density. So obviously, new souls can come in, but I'm not aware of them coming in down at the bottom. I'm only aware of those coming in at the top who are looking down through all the dimensions. That's the only piece I have for you. It's a really good question, though.

Jay Pee: Indeed.

Alex: I don't know if the As would even know.

Jay Pee: Okay, we got another really good question which is Terran human genetics. Did the As specifically as the group alter the Terran human genome, or are we only distantly related to them as we are to all of the other galactic human races?

Alex: Okay, great question. Let's clear the air on this. There is contributing to the gene pool, and then there is altering the gene pool. Now, when you talk about altering, we're talking about those too who have taken humanity, women specifically, off-world or in their ships, and they've altered their DNA to turn off or turn on specific genes, so that the body would either create this or it would stop creating that such as vitamin C. Our bodies used to create vitamin C which gave us an unusual longevity of life. The groups that came in and altered that turned it off, they turned it off. So that's altering.

When you have an extraterrestrial race that has been here and has mated and created offspring, we're using their DNA mixing with our humans DNA, what we know as ourselves, Terrans, and having offspring, that is contributing to the DNA. There is a huge difference. One enhances, one does not. Yes, the As contributed to our genome.

Jay Pee: The As contributed, that means that they had relations with human women and we are sharing our world with the descendant of these beings.

Alex: Yes.

Jay Pee: Cool. Loan Oak Seven asks, "How do we know when our timeline or dimension is shifting or changing? Physical, emotional symptoms, mental symptoms. How do we know?"

Alex: Well, God, you know, it was Loan Oak, is that right? Was that his name, Loan Oak?

Jay Pee: Loan Oak Seven, yes.

Alex: Loan Oak Seven. Geez, you know, Loan Oak, I can only speak for me. When things aren't working for me in my life I know I need to make a change. You just kind of know when things aren't

going your way and you can't catch a break. You know, you're spiraling into depression because your thinking is bad or it's wrong. You kind of know. And I would say to you that if you don't know when things aren't working for you, I don't know that anybody else is gonna be in a position to exactly tell you why it's not working, because if you don't know you don't know. You have to pay attention. You have to pay attention, you have to know what it is you want. If you're not getting what you want then you have to change the way you're approaching it or the way you're thinking about it. It's real simple, actually. You first have to figure out what it is you want, and then focus your intention on what it is you want and nothing else, okay. That's it. That's how it works. It isn't rocket science.

Jay Pee: It's been very good. I've actually used some of these ideas because I had my terrible internet issues and nothing seemed to be doing. So I turned and focused, right, okay, this is what I want, and I've achieved it. I've got a great speed now and we've got a great connection. So that's an example. All right, from Russell.

Alex: Ohm, ohm.

Jay Pee: Ohm, ohm...[? 01:10:06], indeed. From Russell, Alex, can you explain why certain Reptilians are trapped here if they're forth density? I understand CERN was an endeavor to create a portal to the fourth density so they can get out and/or share dark resources with entities, but aren't there already portals here to the fourth density?

Alex: None that are open, no. Those have all been closed and they're all being monitored for a reason. And those Reptilians who came down here in fourth density, the technology that they were wearing either quit, or out, or was stolen from them. So they have no ability to return back. They're stuck here and they will be dealt with. They will be dealt with because they're very angry, they typically are very, very angry because they don't wanna be here either.

Jay Pee: And presumably there's some method of detection that the As or the allies can use to kind of find them, and say beam them aboard sort of thing.

Alex: Okay.

Jay Pee: Is that a reality or is it [? 01:11:21]?

Alex: Yeah, I mean, let me give you the example of a radio wave, and you know about this stuff, Jay Pee. You have a radio wave and it's very stable, and then all of sudden you have a blip. You have a blip here, you have a blip here. You have a spike. It's the same concept with dimension because what you're dealing with are frequencies. You are still dealing with frequencies and when you see a spike in from third to fourth, you know that someone...that there's activity there. So they move, okay, and they will either suppress the spike or they will monitor the spike to see exactly what is occurring. And it's the same thing with fourth density and fifth density. What you are doing is you're monitoring frequency.

The frequencies in fourth into fifth, when you have a lower frequency spike into a higher frequency they pay attention to it, all right, they do. And it's the same thing with a higher frequency spiking into lower. They pay attention to it because it is not the norm, it's not supposed to occur that way. It is no different with third density and fourth density. A spike up into fourth from third density, they know we don't have that technology or we're not supposed to, so they immediately monitor it and move in to see what it is, to record it, and it's no different from fourth density spiking into third density. They know that depending upon the field, if it's negative they know immediately what it is and they know they're

not supposed to intervene that way, so they immediately move in and record it and deal with the energy, deal with the spike or the event which is usually what it is. It's an event, or someone opening a door or closing a door. We're dealing with frequencies. All life, all physicality is light, color, and sound, all of it. If you break it down to it's smallest parts, what you will see is nothing but energy that is held together by the intent of its creator. That's what it is.

Jay Pee: Magnetized by thought. From Alexander once again. Now here's a really interesting one. H₂ versus O₂. In our distant past misunderstanding occurred between oxygen based life forms and hydrogen based life forms. Does the different process with gave rise to these different practicalities lead to difference in mental or energetic perception? In other words, does the O₂ mind think differently than the H₂ mind? What an interesting question.

Alex: Alexander, you're smarter than I am. I don't have the answer to that one.

Jay Pee: He's another Alexander, so it must be from the same collective.

Alex: I do not have the answer to that. I'm just a lonely journeyman here. I don't have that answer.

Jay Pee: All right. Edayas. Alex, in your understanding, why do we dream at night? I think we had spoken about dreams before. There may be a previous answer to that.

Alex: Many people, you know, I could not honestly give you a satisfactory answer to that because most of my dreams, my own personal dreams now are all color, and I know that I'm doing work while I'm asleep. I'm 24/7 actually, and I cannot recall the last time I had a black and white dream which is, of course, the subconscious. So I know that for me there are just not enough hours in the day, so when I go to sleep my body rests but my soul doesn't. It's constantly working trying to figure things out. It could be that I'm connecting with other souls in the never-realm, whatever you wanna call it, the dream realm to work out things, or to get some things accomplished so that when I come back and I wake up in my physical form I'm working towards a goal and getting some [? 01:15:52].

The Toltec's talk about using dreaming body to do exactly that, where they intentionally know they're in the dream, and what they'll do is they'll go to different places and accomplish things that will help them when they awaken in their physical form. That's what I believe I'm doing. I'm not saying I'm a Toltec, but that's what I believe I'm doing. So that's [? 01:16:21] I can't speak for other. I just don't know.

Jay Pee: Yeah, maybe not a short-tec, maybe not a tall-tec either, but anyway. From Loraine. In the past, you've mentioned that the As are in awe of our ability to create music out of thin air. Have **Morne** or **Vesayer** ever specifically mentioned an artist or star they particularly enjoy? I do like that, Bach or Led Zeppelin, you know.

Alex: No, not specifically, but I will tell you that they were enamored with classical music that we would play here, enamored with it.

Jay Pee: Excellent. Question from Luka, can Alex describe how steerable Nibiru is, how it works?

Alex: I don't know. I have no idea. I mean, if they had to make it stop its orbit, it clearly doesn't make right and left turns. I mean, there's consequences to changing the orbit of a star or anything, because it has a specific relationships, it has an energy field. It projects energy, it has a gravitational field. It

affects other things when you change it. And as far as Nibiru, the fact that it has stopped, if it continues to stop and it waits for us to pass to get out of harms way and then move, that should tell you that its orbit is stable and that's what it's meant to be. It's just what's happening is they're buying us a window, they're giving us this incredible window to get out of the way so we can continue to evolve spiritually without all this horrible stuff happening, which has happened in the past on earth. It has caused pole shifts and other things which have been tragic, but here we have an opportunity where we're being given a window of time to continue our spiritual evolution and not have to go back to ground zero. If it maintains, if what's happening now maintains itself, the minute it doesn't I'll let you know. It's [? 01:18:49] .

Jay Pee: [laughs] From Alababa, where will we be able to travel again to our family constellations like Lira and other constellation? Though our heart would we be able to embrace our families in the starts? I'm missing so very much as a warrior here, it is my strong wish they leave us alone in peace. Are we the decedents of Tara? Ah, too many, several questions here.

Alex: [laughs] I don't know to all those questions. I don't know. I would think some of us are maybe ancestors or related to those in the Lira, into Tara she said, Tara? Whoever that is. The question, I don't know. I don't know. I mean, what we really need to focus on is the task that's in front of us right now, okay, and that's changing the harmony and the frequency of our race and of the planet. That's the work that's in front of us right now. It is not three lifetimes from now being able to travel by starship to Lira. That's not the work right now. The work right now is us, here in the present, and we need to stay focused on the present. I'm lonely too but this is what it is. This is what it is. Sorry to be [? 01:20:23] about that, guys, but it is what it is, you know.

Jay Pee: You know, there's a lot of people who are in the same position, and thank God we got the internet that we're able to actually connect with each other.

Alex: Exactly, yeah.

Jay Pee: Look at you 30 years ago, and like our voice in the wilderness, you know.

Alex: [? 01:20:40] into the wind. I was screaming into the wind.

Jay Pee: Yeah, okay now here. What about the jet-stream lowering down to ground level and causing extreme weather. Is that still going to happen?

Alex: To be determined. To be determined. You know, that fact that Nibiru has stopped and is stationary, that can be perceived as a game changer. We will just have to see. I'm sincerely hoping that it is a game changer in a positive way. We'll have to see folks, I don't know. I don't know.

Jay Pee: From Adayas again. Alex, what do you make of this recent talk about partial disclosure as the new plan which is going around truth circles? And follow up, what do you think of grassroots effort for full disclosure looks like as far a people's intentions manifesting the disclosure? Does that make sense?

Alex: You know what, there's so many people who are awake that have done their own research and they don't need the government to tell them a damn thing. They already know. They already have the answer, and the answer is we're not alone and never have been. So you know, that's the answer. As far as partial disclosure, why is it necessary that you hear about it on Fox News? That's what I don't get. That's what I don't get about you guys. You know, why do you need Fox News to tell you? You don't.

You can do your research, you already know. You can make up your own mind. You don't need the news to tell you. Half the time the shit on the news is bullshit anyway, they just make it up, or they spin it in such a way that it creates fear or it discredits someone else. Empower yourself, seriously, empower yourself. Partial disclosure, I mean, what's the difference between partial and full at this point. I mean, go on the internet and look at the sky cams of Nibiru. You can see it whether you're in Costa Rica, whether you're in Chile, whether you're at the South Pole, whether you're at the North Pole, whether you're in British Columbia, all the cams see it. You need more information than that. You need somebody from Fox News to read a script and tell you, "Hey folks, there it is," and then you'll know for sure it's there. You don't trust yourself to know. I don't know what to do about that guys. I don't know what to do about that.

Jay Pee: I very much agree, Alex. We're all trying to prove...I think what it is is trying to prove it to our family that we were right in the end, and then really, that's not what it's about. We need to know in ourselves, don't we?

Alex: That's it. If you know it, it doesn't matter what anybody else thinks. But you know what, eventually they're gonna come up behind you and say, "Damn, you were right." It's gonna happen, okay, it's gonna happen.

Jay Pee: All right, here's a good one. This connects with our conversation the other day. From Sue, who is the Ashtar Command, friend or foe?

Alex: O-Oh.

[laughter]

Alex: You didn't plant that question, did you Jay Pee? That's a real question.

Jay Pee: Honestly, that is absolutely from the chat room, totally, un...and go ahead.

Alex: Okay, let me give you some background on this group, and I know that there are some really wonderful people who are very much in that camp. And you, of course, have your own free will to choose whatever it is that you want, but I will tell you what I do in fact know about this group.

Very, very long ago on earth, during many, many extraterrestrial warring groups that had occurred, there was an organization known as Gizah Intelligence. And I believe Meier's Pleiadians have also made reference to this group. It was known as Gizah Intelligence. One of the leading members of the Gizah Intelligence which was a regressive group, I wanna make that clear, was Ashton Sharia, now known as Ashtar. They hail from Aldebaran, they are in fact Pleiadean, a Pleiadian group. However, they are negative field, and I mean negative field. They were horrible tricksters, and their job was to infiltrate both sides and then report or leverage the information to their own means. Terrible things happened because of their manipulations and interventions. That's who this group is. That is who this group is. And you know, don't waste your time ripping me a new asshole, I don't care. That's who this group is. You need to come to terms with it yourself. That's all I have to say about it. That's who they are and you will never convince me otherwise.

Jay Pee: [laughs] So where are we? Back to the questions. From Gene, what does the current political situation have to do with what's going on cosmically? Now, I wanna just kind of expand and say global political situation rather than just you know, is it gonna be Trump or Hillary. You know, proper politics,

exopolitics, Putin and all that stuff.

Alex: Oh my God.

Jay Pee: I'd like to just expand. Oh, by the way, is it the As who Putin is in contact with?

Alex: I'm not aware of that. I'm not aware who he's in contact with and that's not something they would ever even tell me. So no, I don't know. So that's that question. As far as the political scene, I purposefully think they're turning it into a circus to keep us all distracted, and dis-empowered, and second guessing everything, instead of focusing on our own spiritual evolvement and trying to get centered. You know, the more chaos that there is, the more of a circus atmosphere, the more fear that it usually generates. And that's their intention is to generate fear, not peace and harmony, because if that were true they would have come clean with all of their nonsense, and they're just simply not gonna do that because they're in fear. They're in more fear than we are at the present moment, which is why they're trying to create all this fear so we don't figure out what the hell it is that they're doing.

So you know, it starts at the top and it's a circus. You know, their whole plan for world domination is crumbling around them. Their whole infrastructure that they've created to create world domination is crumbling, because everybody is figuring out these guys are absolutely diabolical and no one wants a part of it. So it's just a big distraction to create more fear. That's why I've said, you know, for some time now you have to be the observer. Not emotionally buy into it, be the observer and just watch how things are falling into place, and you will know what's really happening. You don't wanna give your energy to this crap. You wanna keep it, you wanna keep it to yourself. You wanna empower yourself with your own positive energy. You don't wanna buy into all the nonsense, all the fear, because that's what keeps them in control, okay. That's what feeds their drama is all the fear, and we wanna starve these bastards out of here. We really do, we wanna starve them. They're not looking for love, they're looking for fear. So let's just not, let's give them love and starve them out of here.

Jay Pee: Last one, this is from Mark. Can UFO or a craft jump between dimensions like third to sixth?

Alex: A sixth dimensional light ship can jump into third. A third cannot jump into fifth or sixth, not even fourth actually. It can't because the solidity of the field, of the craft, how do I put this? When a starship comes down from say fifth density into third, and what it will do is it will create a field, let's say 30 meters. It will declare a space of 30 meters. Inside that ship though it may be 700 meters. The inside of the ship will be larger than the outside and that's because it is still connected to fifth density. It is still maintaining its original frequency. When we see it here it is only taking up this amount of space. We should not ever assume that what we see is exactly what it is. It could be much larger. It is only borrowing this much space to observe what's going on in our dimension. It is rare that a ship from fifth density will totally express itself, and will expand and maintain that amount of space. They don't need to. Remember, everything's an ecosystem and that's exactly how they think their ships. If it's holding this much space, it's only affecting this much of our frequency, our dimension. They're very, very mindful of that.

So, sixth to third. Third to sixth won't happen, won't happen. And even if like say we were talking about the archons how they flipped up into fifth using the field, using CERN, they were immediately found out, right, because they were able to see the event occur. And what happened is their frequency caused a huge spike, caused a spike in fifth-dimensional frequency which everybody saw because it's an ecosystem. It's a frequency. The minute that spike was there they knew something had happened. Now they were never going to be able to stay there because their physiology simply isn't conducive to

that frequency, all right, and that's what happened.

Jay Pee: Okay, thank you. Elbasan, have animals been genetically affected like us by the wars that happened way back? When did the animals blood change from copper base and wolves plant eaters or where they genetically altered? Who were the animals before this occurred? So there's a few questions here.

Alex: I don't know that. I don't have an answer for that. I don't know everything, I just don't know everything, you know.

Jay Pee: I know, but you do know loads of stuff, though. So not everything, but loads of stuff is enough. All right, so here's an interesting thing. This is from Hellene. Are the Nephilims cause of the chemtrails so that humans will not evolve together with the old earth evolution?

Alex: No. No, we can't blame that on the Nephilims. No, we can't blame that on them. I think that that was part of the master plan to eliminate much of humanity through diseases. I believe that was the original intent.

Jay Pee: Okay, and Coral, why didn't the other races destroy the grid sooner?

Alex: You know, I don't know what the original plan was. I do not know. But again, if I had a fall-back position, it would be to go back to the fact that the regressives have been using humanity as a hostage. So I think certain steps had to occur in such a way that it would undo those certain acts or aggression against humanity, so that when the frequency began to move into and hit our nervous system, and that's where it's hitting. Remember, the soul attaches to the body through the nervous system. When these cosmic energies and knowledge start hitting our bodies, our nervous system and our body, our minds and our DNA begins to awaken to the knowledge. Remember, it's reawakening to the knowledge that we're getting. They wanted to create some distance so that the negative field was more isolated and I believe that's what was occurring. They're very, very strategic with any type of intervention and they have to be. It is not you come in like a gunslinger blazing and shooting. That would create more chaos, more fear, and that is not what they're about. That's what I got. You know what, I will make sure I ask that question, you know, why didn't it happen sooner. I will ask that question too, whoever that person was.

Jay Pee: It's a good one but it's probably exactly as you said, humanity is being held hostage by weapons of unimaginable destruction that we don't even know about that technology.

Alex: Exactly, exactly.

Jay Pee: So [? 01:36:23], yeah, this is a good one. This is from Bea. Hi, Alex, can we help raise the frequency by meditating? Are crop circle patterns made to help raise the frequency? And remember, we had a conversation about crop circles about two, three years ago.

Alex: Yes, we did. The circles, we'll go with that first, the circles. The circles are not only data, but it's also information that's been given to the planet. It's coded information that's given to the planet. Harmonic frequencies and knowledge given to the planet, and it could very well be that there is a great deal of communication going on between the benevolence and the planet so that everybody is aligned with what is supposed to go on. You know what guys, I have to give up my room. Okay, thank you guys.

Jay Pee: Great, great. Thank you so much, Alex. It's been a really good one today. You're looking well. Thank you very much and good night. Any final messages.

Alex: I love you.
